Geoscience Australia

An Update from Australia and New Zealand

Meeting of the U.S. Civil GPS Service Interface Committee

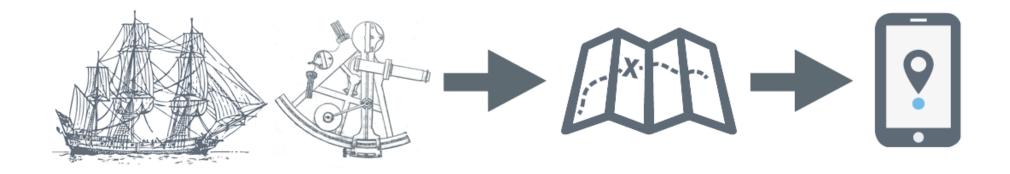

Dr John Dawson, GA, Dr Matt Amos, LINZ

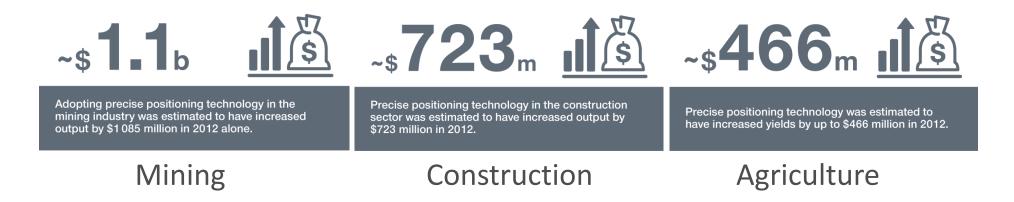

APPLYING GEOSCIENCE TO AUSTRALIA'S MOST IMPORTANT CHALLENGES

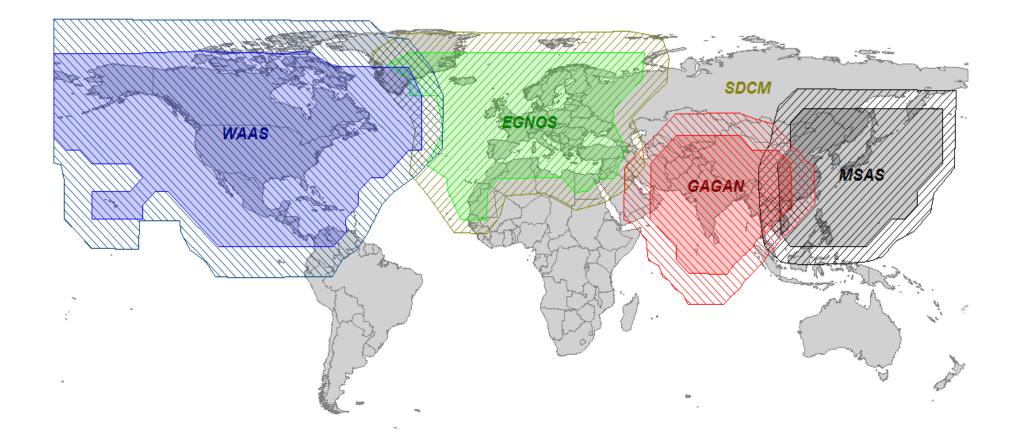

Why - Positioning, Navigation and Timing (PNT)

GEOSCIENCE AUSTRALIA

Satellite-Based Augmentation System (SBAS)

GEOSCIENCE AUSTRALIA

What is the value of SBAS?

- 10 industry sectors:
 - Road, rail, aviation, maritime, agriculture, mining, construction, spatial, consumer, utilities
 - 28 projects

What is the value of SBAS?

- Economic benefits analysis considers:
 - Health and safety
 - Operational savings labour
 - Operational savings other productivity
 - Environmental
 - Capital expenditure avoided
 - New revenue
- Project \rightarrow sector x uptake(time) \rightarrow economy
- Public report by Q1 2019

2-year SBAS Testbed Project Completing February 2019

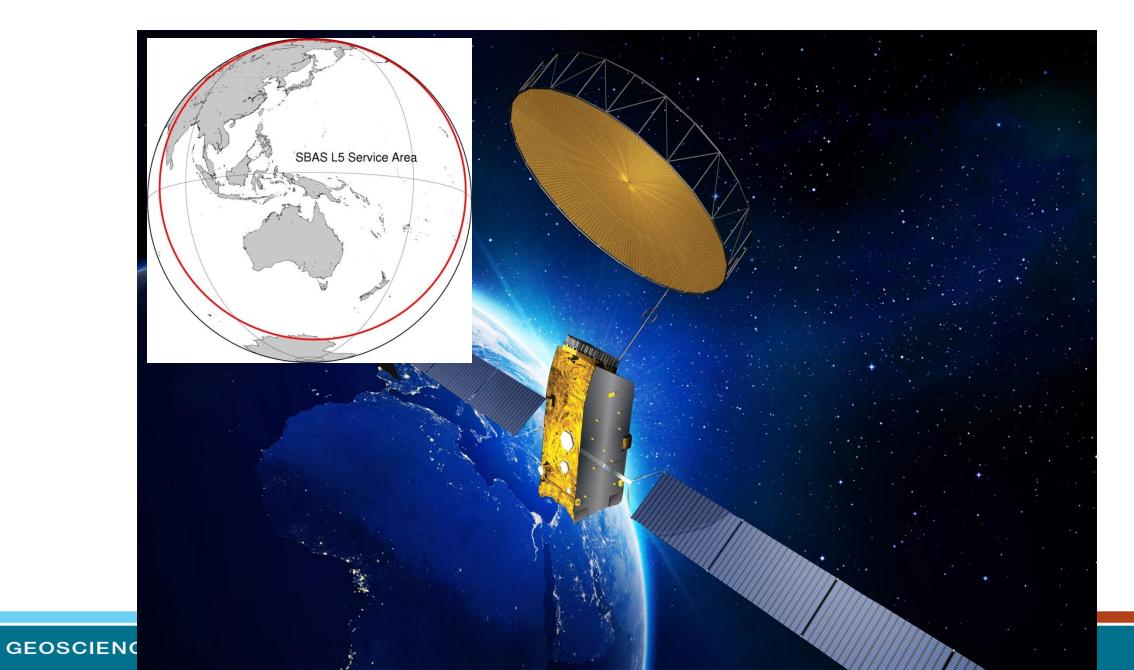

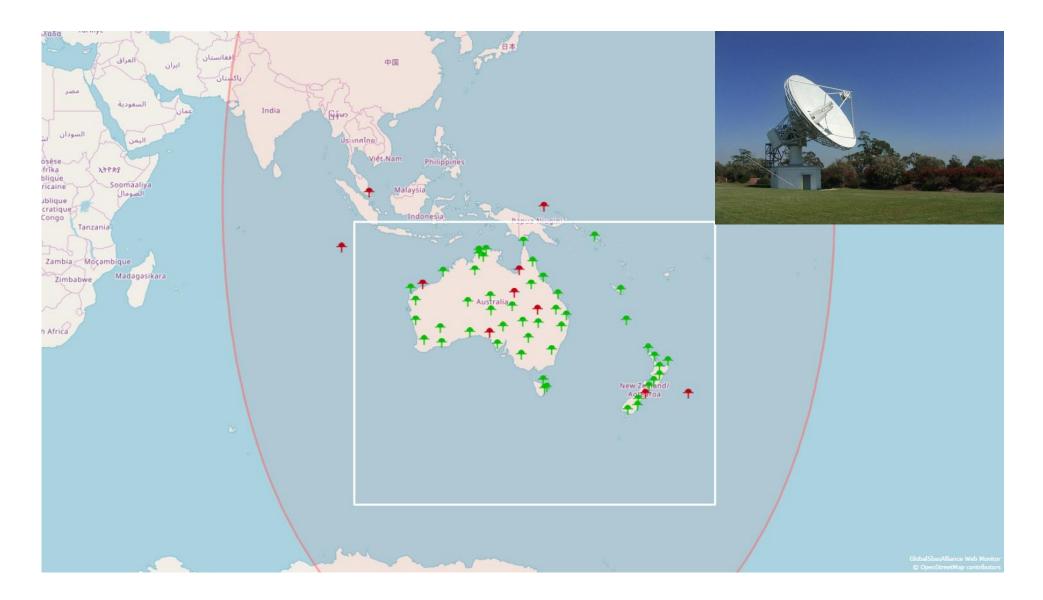

GEOSCIENCE AUSTRALIA

SBAS: Inmarsat 4F1 GEO Satellite

SBAS Test-bed: CORS Infrastructure

GEOSCIENCE AUSTRALIA

SBAS Test-bed Performance

Kinematic Platform 15-hour Segment

Solution	Horizontal RMS (m)	Vertical RMS (m)
SBAS	0.40	0.50
PPP	0.05	0.10

2018-19 Australian Federal Budget

- Funding allocation for better satellite positioning
 - Satellite-Based Augmentation System (SBAS)
 - National Positioning Infrastructure
 - Ongoing operational funding

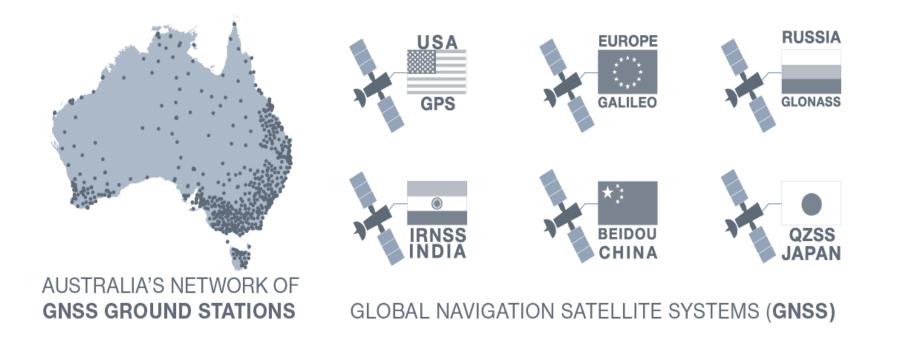

Australia's Approach

Integrated national positioning system

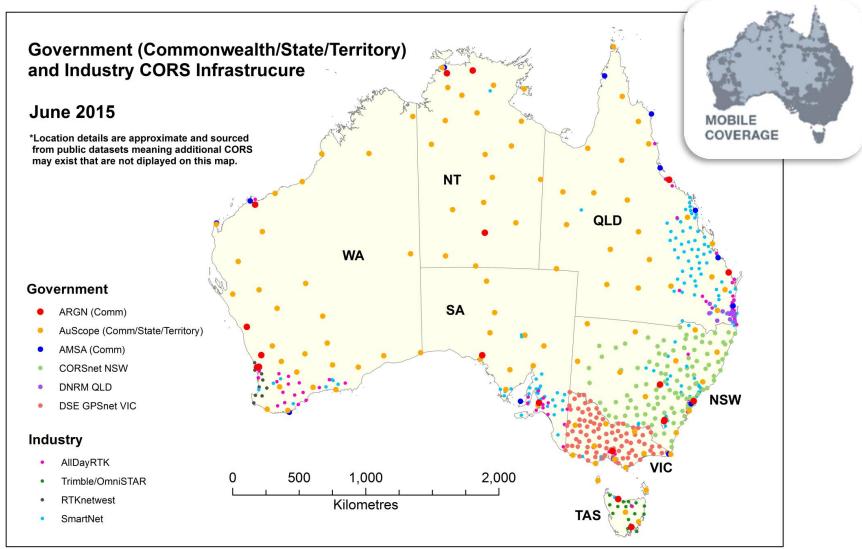

L1 GPS SBAS (aviation) DFMC SBAS open service Open access PPP (10cm) High reliability core network Open CORS data Open source software

Australia's Opportunity: GNSS

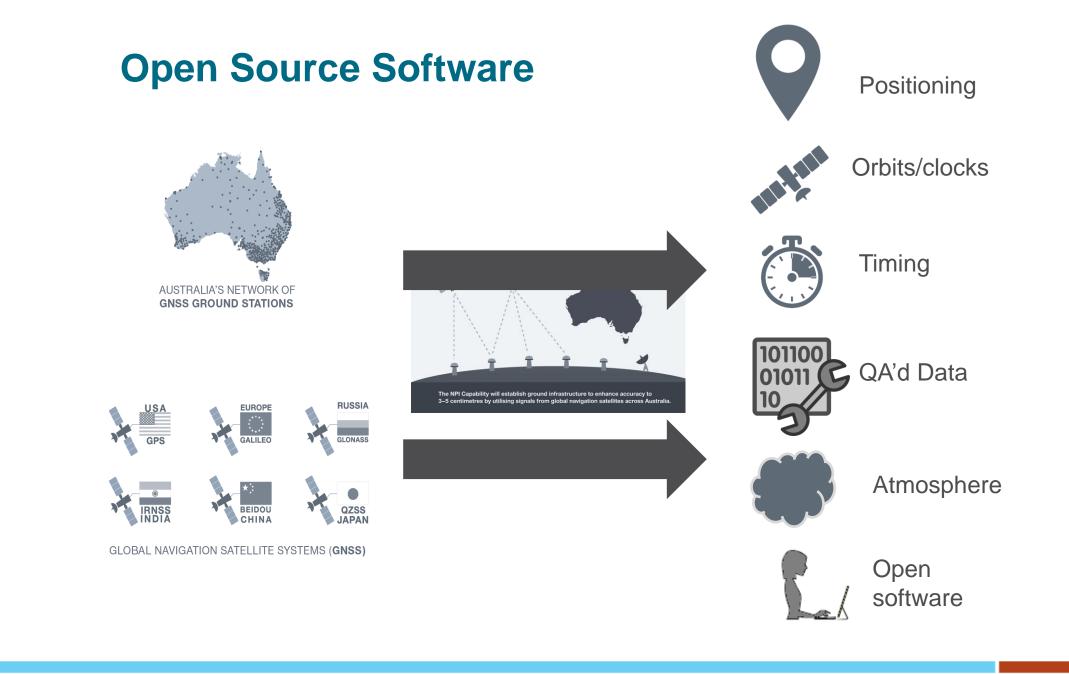

Strong research capability, multi-GNSS, applications focus

Australia's GNSS Infrastructure
