Nationwide Differential GPS (NDGPS) Program Update

53rd Civil GPS Service Interface Committee
Institute of Navigation/GNSS 2013 Conference
Nashville, TN
September 17, 2013

Jim Arnold
Research and Innovative Technology Administration
NDGPS@dot.gov
NDGPS Operating Partners

- United States Coast Guard
  - DGPS systems engineering, operations and maintenance
  - Aids to Navigation (maritime)
  - No USCG carriage requirement
- Army Corps of Engineers
  - Dredging and underkeel clearance
  - Underwater survey
- US Department of Transportation
  - Surface transportation applications
    - Safety systems
    - Survey and construction (AMC)
    - Asset and fleet management
    - Structures monitoring
    - Roadside/ROW management
    - Transit bus and rail location and separation
  - St. Lawrence Seaway (with Canada)
Planned Site Closure/Reduction of Caretaker Sites

- ACOE Declared Omaha NDGPS Site Excess in CY12
  - Omaha signal terminated May 15, 2013
  - Omaha site users have been redirected to:
    - Clarke, SD (DOT)
    - Topeka, KS (DOT)
    - Rock Island, IL (ACOE)
- DOT “Caretaker” Sites (GWEN) being removed from Property Rolls
  - No new NDGPS construction planned; no budget support
  - Presidential memorandum – Disposing of Unneeded Federal Real Estate
  - Reducing maintenance and lease costs
  - 19 locations
    - 4 without infrastructure already released
    - 15 with infrastructure under environmental review
DOT NDGPS Program Status

- Inland (DOT) Tower Recapitalization
  - Upgrade reference stations/integrity monitors/antenna
  - Install IP-based operations system
  - Upgrade transmitters
  - Set long-term O&M baseline, 15 year service life
  - Set a single “plug and play” configuration across all NDGPS sites
  - Full funding received; execution in progress

- Relative Budget Consistency
  - Strong support for an O&M “floor”
  - USCG Billets (FY2016 commitment current)
  - Aided by several cost control measures

- NDGPS Program Manager/Spectrum Manager Hire
  - Hiring action completed early CY13
  - Support DOT Engineering needs for NDGPS program management and DOT Spectrum management
Analysis - Future NDGPS Investment Decisions

• Identify and assess alternatives
  – Technical assessments of impacts of alternatives
  – Cost assessments of alternatives/use cases
    – Requires site-by-site assessment as well as systemic
    – Need to include costs for various scenarios:
      – Continuation/partial continuation/phased continuation
      – Partial/staged decommissioning – by site/use cases
      – Transfer to other parties
      – Hybrid alternatives
    – Ongoing O&M; environmental assessment and remediation; deconstruction; cost/benefit assessments

• **Decision timeline**: NET Summer 2014
  – FRN: Support FY16 budget request (implement NET FY16)
    – Existing O&M budgets (USCG and DOT) cannot support deconstruction and site remediation, especially if continuing service
  – Support planning/decision processes within USCG and USDOT
Continuing Responsibilities

• Uninterrupted NDGPS service to users as currently provided
  – Routine operations and maintenance of 85 NDGPS sites
    (49 USCG/Maritime, 29 DOT/Inland sites, 7 ACOE).
  – Watchstanding, troubleshooting, systems support engineering,
    systems analysis and reporting

• Public/user community information/involvement in decision
  processes and Next Steps

• Continuation of DOT site recapitalization
  – Full funding received and work in progress
  – Sets long-term low-cost O&M baseline, 15 year service life
  – Sets a single “plug and play” configuration across USCG and
    DOT sites for reduced outyear O&M costs
  – Enables all possible alternatives/use cases for decision
