Things To Remember

• GPS is critical to our national infrastructure and economic security
  – Airlines, communications networks, logistical supply chains, etc.

• Ongoing GPS modernization program is improving user performance
  – Will support Next-Generation Air Transportation System

• Civil agencies are responsible for funding new, civil-unique GPS capabilities
  – DOT appropriations provided for certain civil aspects of GPS modernization is FY08 and FY09
GLOBAL POSITIONING SYSTEM
Serving the World

The Global Positioning System (GPS) is a U.S. space-based navigation system that provides reliable positioning, navigation, and timing services to civilian users on a continuous worldwide basis -- freely available to all. For anyone with a GPS receiver, the system will provide location and time. GPS provides accurate location and time information for an unlimited number of people in all weather, day and night, anywhere in the world.
