#### **Definitions:**

### **Abbreviations:**

ASAL – Algerian Space Agency

SPAN - Southern Positioning Augmentation Network (AUS-NZ)

BDSBAS - BeiDou Satellite-Based Augmentation System

EGNOS - European Geostationary Navigation Overlay Service

GAGAN – GPS-Aided Geo-Augmented Navigation

GBAS – Ground-Based Augmentation System

KASS - Korean Augmentation Satellite System

MSAS – Michibiki Satellite Augmentation System

NSAS – Nigerian Satellite Augmentation System

PRN - Pseudorandom Noise

QZSS - Quazi-Zenith Satellite System

SDCM - System of Differential Correction and Monitoring

WAAS - Wide Area Augmentation System

<sup>&</sup>quot;Unallocated" – This PRN number has not been assigned to a system provider for any signal (L1 C/A, L1C, L2C, or L5)

<sup>&</sup>quot;Reserved" – This PRN number has been assigned to a system provider for a different signal (L1C, L2C, or L5). Therefore the PRN number for this signal is unassigned but held in reserve.

<sup>&</sup>quot;SYSTEM (Reserved)" - The system provider has been assigned the PRN for this signal, but the broadcasting satellite is not specified

<sup>&</sup>lt;sup>i</sup> In the octal notation for the first 10 bits as shown in this column, the first digit (1/0) represents the first bit and the last three digits are the conventional octal representation of the remaining 9 bits.

ii For further information see the latest edition of IS-GPS-200 at http://www.gps.gov/technical/icwg/.

iii For current PRN assignments and orbital information for GPS satellites please see the Navigation Center website at http://www.navcen.uscg.gov/?Do=constellationStatus.

iv QZS-3 will broadcast two PRN signals-each of which is received from an independent uplink station-in order to maintain continuity in case of uplink signal failure.

<sup>&</sup>lt;sup>v</sup>QZSS A1: RAAN = 0, Argument of Perigee = 270, Mean Anomaly = 324, at Epoch 31Dec 07 00:00:00.
